

**49<sup>th</sup> Dixie Crow Symposium  
Crows N.E.S.T.  
Museum of Aviation, Century of Flight Hangar  
Wednesday, 26 March 2025  
1000-1400**

**The Dixie Crow Chapter of the Ass'n of Old Crows is excited to bring back The Crow's N.E.S.T. (Novel Experiments with Science & Technology) for our 49<sup>th</sup> Dixie Crow Symposium.**

**Originating in 2014, The Crow's N.E.S.T.** promotes Science, Technology, Engineering and Mathematics (STEM) by showcasing Robotics displays, technology demonstrations, and technology conversations with interactive experiences that capture the minds and hearts of students, parents, and teachers.

The event is a collaborative effort between local military, government civil service, academia, defense industry, and volunteers designed to inspire students to pursue STEM careers. Interaction with the robotics displays and technology demonstrations will demonstrate to students that STEM can be both fun and engaging. Enthusiastic workers in STEM fields will be on hand to answer questions and help students learn how they can prepare to enter the exciting world of STEM.

**Planning for our 2025 event includes 12-15 Interactive Demonstrations and ~120 participating Students from the Middle Georgia area.**

**We hope you'll join our N.E.S.T. activity as a technology participant.**

**Crows N.E.S.T. Coordinators:**

**Brandon Head**
