

Dixie Crow Chapter of the AOC along with 21st Century Partnership and Georgia Power presented Houston County Schools with a check for \$30,000 to fund a Houston County Middle School Drone Project.

This past summer, the Dixie Crows asked Mr. Lindsey Levie, TSA Advisor, to huddle with all other Houston County middle school STEM leads to come up with a county-wide project that would benefit all county middle schools and have long-lasting impact. Through joint sponsorship, each of the 7 Houston County middle schools, that have engineering programs, will receive a set of 8 drone kits and each kit can be built/re-built + coded + flown in competitions (all by the middle school students) each year over several years. Ultimately, they're all working towards being able to compete in drone soccer competitions.
